

The **ITM plastic chutes** are an efficient solution for the correct evacuation of debris on any construction site. They avoid the escape of debris and reducing the effect of noise and dust. Its use is very simple. A succession of tubes joined together is placed from the evacuation point to the container.

Debris chute	Dimensions	Material	Colour	Weight	Code
	Ø Max. 470 mm Ø Min. 400 mm Height 1055 mm	PE-HD	Yellow	9 Kg	001003
		Metallic components	Washers DIN 125: 4 Self-locking Nuts DIN 985: 4 Quick link: 2		
Packaging	25 Units per pallet / Pallet size 115x115 cm				

The **ITM plastic chute** with hopper is the initial piece of the rubble chute column, indicated for the debris evacuation on any construction site. It can be used, according to the needs of construction, as an intermediate or lateral loading mouth.

It is perfect to enable a debris evacuation point from any part of the rubbish chute column. The ITM hoppers give construction professionals access to the rubble chutes column from a window, a balcony or intermediate floors.

Standard debris chute (with hopper)	Dimensions	Material	Colour	Weight	Code
